

# Power wheelchair Scewo BRO.

Everything important at a glance.

Scewo BRO is a complete power wheelchair, which with intelligent technologies allows an independent and safe everyday life, both at work and at home. This unique combination of technologies and intelligence unites several aids in one product.

## 1 Economic benefit

BRO allows for fewer adaptations to be required at home, at work, or at the place of education. It also reduces the financial burden of relying on a caregiver.

## 2 Stair climbing

Thanks to intelligent stair climbing technology with tracking assistance, various obstacles can be overcome independently and building modifications are not necessary.

## 3 Height adjustment mode

The ability to hold a conversation at eye level and the expanded scope of action provided by the seat lift ensure social inclusion thanks to equal participation in everyday life.

## 4 Transport & Operation

The unique remote control allows easy loading into standard passenger cars and BRO can be customized to the user's individual needs with various add-on products.
